\$1,181,182,812
\$1,392,023,944

- (1) In 1980, the State Legislature added Division 9 to Title I of the Government Code to implement Article XIIIB. This legislation required the governing body of each local jurisdiction in California to establish a tax appropriations limit on or before June 30 of each year for the following fiscal year, pursuant to which the City of San Diego has been establishing this limit since 1981.
- (2) Beginning in Fiscal Year 2009, the calculation to determine the Gann Limit is based on the City's new non-residential assessed valuation data. From Fiscal Year 2004 through 2008, the County's data was used. This change does not affect the City's compliance with the Tax Appropriations Limit in prior years. This table shows the corrected price adjustments and appropriations limits based on City data. Appropriation limits shown for 2004 2008 are corrected amounts based on City data.

### ALTERNATIVE ADJUSTMENT FACTORS

Under Proposition 111, there are two options available for each of the major adjustment factors. The values of these factors for the purpose of calculating the Fiscal Year 2010 adjustment are as follows:

# Price Factor:

- (A) Percent growth in State per Capita Personal Income: +0.62% (Source: Dept of Finance, California-Attachment 2A-2)
- (B) Percent change in Assessed Valuation due to new non-residential construction: +16.06% (Source: San Diego County Assessor's Office-Attachment 2B)

# **Population Factor:**

(C) Percent growth in County Population: +1.26%
(Source: Dept of Finance, California-Attachment 2A-3)

(D) Percent growth in City Population: +1.54%
(Source: Same as 'C' above)

### Annual Adjustment Factors:

Based upon the actual data, the four alternative adjustment factors are as follows:

$$(A \times C) = (1.0062) \times (1.0126) = 1.0189$$
 $(A \times D) = (1.0062) \times (1.0154) = 1.0217$ 
 $(B \times C) = (1.1606) \times (1.0126) = 1.1753$ 
 $(B \times D) = (1.1606) \times (1.0154) = 1.1785 \text{ (rounded to 4 decimal places)}$ 

The recommended limit was calculated using the adjustment factor "(B x D)", resulting in a 17.85% increase to the annual Tax Appropriations Limit. Of the 4 adjustment factors above, 17.85% represents the largest allowable increase to the appropriation limit.

# **Calculation of the Fiscal Year 10 Limit:**

Fiscal Year 2010 Limit = (FY 2009 Limit) x (Recommended Adjustment Factor) = (\$1,181,182,812) x (1.1785) = \$1,392,023,944

ARNOLD SCHWARZENEGGER, GOVERNOR

915 L STREET ■ SACRAMENTO CA ■ 95814-3706 ■ WWW.DOF.CA.GOV

May 2009

Dear Fiscal Officer:

**Subject: Price and Population Information** 

### **Appropriations Limit**

The California Revenue and Taxation Code, Section 2227, mandates the Department of Finance (Finance) to transmit an estimate of the percentage change in population to local governments. Each local jurisdiction must use their percentage change in population factor for January 1, 2009, in conjunction with a change in the cost of living, or price factor, to calculate their appropriations limit for fiscal year 2009-2010. Enclosure I provides the change in California's per capita personal income and an example for utilizing the price factor and population percentage change factor to calculate the 2009-2010 appropriations limit. Enclosure II provides city and unincorporated county population percentage changes, and Enclosure IIA provides county and incorporated areas summed population percentage changes. The population percentage change data excludes federal and state institutionalized populations and military populations.

### **Population Percent Change for Special Districts**

Some special districts must establish an annual appropriations limit. Consult the Revenue and Taxation Code, Section 2228, for further information regarding the appropriation limit. You can access the Code from the following website: "http://www.leginfo.ca.gov/calaw.html" check box: "Revenue and Taxation Code" and enter 2228 for the search term to learn more about the various population change factors available to special districts to calculate their appropriations limit. Article XIII B, Section 9(C), of the State Constitution exempts certain special districts from the appropriations limit calculation mandate. Consult the following website: "http://www.leginfo.ca.gov/.const/.article\_13B" for additional information. Special districts required by law to calculate their appropriations limit must present the calculation as part of their annual audit. Any questions special districts have on this issue should be referred to their respective county for clarification, or to their legal representation, or to the law itself. No state agency reviews the local appropriations limits.

### **Population Certification**

The population certification program applies only to cities and counties. Revenue and Taxation Code Section 11005.6 mandates Finance to automatically certify any population estimate that exceeds the current certified population with the State Controller's Office. **Finance will certify the higher estimate to the State Controller by June 1, 2009**.

**Please Note**: Prior year's city population estimates may be revised.

If you have any questions regarding this data, please contact the Demographic Research Unit at (916) 323-4086.

MICHAEL C. GENEST Director By:

ANA J. MATOSANTOS Chief Deputy Director

**Enclosure** 

May 2009 Enclosure I

A. **Price Factor**: Article XIII B specifies that local jurisdictions select their cost-of-living factor to compute their appropriation limit by a vote of their governing body. The cost-of-living factor provided here is per capita personal income. If the percentage change in per capita personal income is selected, the percentage change to be used in setting the 2009-2010 appropriation limit is:

### Per Capita Personal Income

Fiscal Year	Percentage change
(FY)	over prior year
2009-2010	0.62

B. Following is an example using sample population change and the change in California per capita personal income as growth factors in computing a 2009-2010 appropriation limit.

### 2009-2010:

Per Capita Cost of Living Change = 0.62 percent Population Change = 1.11 percent

Per Capita Cost of Living converted to a ratio:	0.62 + 100 = 1.0062
	400

100

Population converted to a ratio: 
$$\frac{1.11 + 100}{1.11 + 100} = 1.0111$$

100

Calculation of factor for FY 2009-2010:

 $1.0062 \times 1.0111 = 1.0174$ 

Enclosure II

Annual Percent Change in Population Minus Exclusions

January 1, 2008 to January 1, 2009 and Total Population, January 1, 2009

County City	Percent Change 2008-2009	Population Minu	Total Population 1-1-2009	
City	2000-2009	1-1-00	1-1-09	1-1-2009
